

Static Line Tension Meter

The Static Line Tension Meter is designed to measure wire rope, where fixed means of measuring is impractical. The unit simply clamps on to the existing rope and when tensioned, a reading is obtained. Due to the small size of the device, the unit can be carried easily from Application to Application.

- Units designed for fixed state tension
- Aluminium or Stainless Steel models available
- Safe area and Hazardous area units available
- Easy to use and setup
- Lightweight model available in Aluminium

Rope Setup

- Clamps made to suit rope size
- Choice of Fixed Gland or Connector interface
- 4-20mA Loop powered, as standard for ATEX units
- Handset or flying lead options for Safe area
